Project Name : Generation of Electricity from Speed Breaker

Role : I Am instrumental in information gathering, project execution, assessment and delivery.

Team Size : 5

Project Duration : 6 Month

Project Detail

The various types of non-conventional source of energy are solar energy, wind energy, Biogas etc. now by developing "POWER HUMP" We can generate power without utilizing any external sources mentioned earlier. Now, Vehicular traffic in big cities is more causing a problem to human being. But this vehicular traffic can also be utilized for Power generation by means of new technique called "POWER HUMP". If it is placed in heavy traffic roads, the weight and kinetic energy of the vehicles can be used to produce mechanical power in shafts and this mechanical power is once again converted into ELECTRICAL ENERGY.
